Guindy, Chennai, Tamil Nadu, IN

CORE SKILLS

- C# / .NET (Full Stack)
- Flutter & Dart
- Graphite GTC (Low-Code)
- MSSQL & Oracle
- Node.js / Spring / Maven
- HTML, CSS, JS, JSP
- Software Architecture & UX
- Project Mgmt & Team Leadership

CURRENTLY EXPLORING

- Angular JS (Beginner)
- n8n Workflow Automation
- AI Integration
- Golang (API Development)
- Python

CERTIFICATIONS

Java Programming — NIIT
Advanced Java — NIIT
Java Enterprise Apps w/ DevOps — NIIT
OCJP Java SE-6 — 96%

EDUCATION

B.E. Computer Engineering
Sree Sastha Institute of
Engineering & Technology
2012 – 2016

PROFILE SUMMARY

Full Stack Software Developer with 8+ years of experience delivering end-to-end enterprise applications across Graphite GTC (low-code) and C# .NET stacks, alongside Flutter mobile development. Proven track record leading distributed teams of 2–6 developers through the complete lifecycle — requirements and use-case creation, architecture, development, testing, data migration, and onsite go-live — across Hospitality, Share Market / Demat Services, Health Insurance, Government e-Office, and Coin Collecting/Trading domains, including onsite delivery for Oman Government Ministry projects.

WORK HISTORY

.NET / C# Full Stack Developer | AltomouhIT

May 2025 — Present

Royal Oman Police (ROP) v2 — Current Project

- Complete redevelopment of the ROP e-Office platform on a full C# .NET stack.
- Currently driving Go-Live activities, coordinating final testing, deployment, and production cutover.
- Collaborating with cross-functional teams on production environment setup, UAT, and sign-off.
- Handling defect resolution, performance tuning, and stabilization ahead of go-live.
- Working closely with the client to validate workflows against real operational requirements before launch.

e-Office v2 — Oman Tender Board

- Rebuilt the Tender Board e-Office platform entirely on C# .NET, re-architecting core tender lifecycle workflows.
- Owned full-stack development along with service-layer (API/backend) handling for the platform.
- Redesigned data models and built migration scripts to move existing tender data onto the new platform.
- Coordinated directly with client stakeholders for requirement validation and UAT sign-off.
- Improved platform performance and maintainability by moving critical modules off the earlier low-code implementation.

Flutter & Graphite GTC Developer → Team Lead | Cloutics Private Limited

2018 — April 2025

e-Office v1 — Oman Tender Board (Oman Government Ministry) — Onsite, Oman

- Developed and led a team of 4–5 developers through the entire project lifecycle — from use-case creation to final delivery.
- Successfully executed client data migration and deployed the application onsite to a live government environment.
- Built dashboards and onboarding screens in Flutter for the platform.

Health India — Health Insurance TPA

- Led a team of 2 developers to design, build, and unit-test a practitioner/provider management module.
- Delivered test management and appointment scheduling workflows for client and insurer data.

HQ Pro — Insurance Domain Application

- Delivered core process modules for the platform as part of the Graphite GTC development team.

GoldMine — Demat Account & Share Services

- Led a team of 2 developers to build an end-to-end demat account maintenance and old-account procurement system.
- Designed a document management workflow covering name changes, nominee updates, and power-of-attorney transfers on share holdings, with complete process-tracking screens.

COPS — Collector Alliances (Coin Collecting & Trading Platform)

- Built core Graphite GTC modules including Campaign Management, Sales Order, and a Pricing Engine for an old-coin collecting and selling business.

PERSONAL PROJECTS

- Trade Call Application (Flutter + Firebase) — Real-time BUY/SELL trading signal

publishing app with entry/stop-loss/target, replacing a WhatsApp-based workflow. In progress.

- Project Management Application (Flutter + C# .NET) — End-to-end project/task management platform with team, use-case, and file management modules. In progress.
